

AFE400 SERVICE PARTS

This is the parts list for the AFE400. When looking up part numbers, always check the complete model and serial numbers to be certain of ordering the correct parts.

The Air Cooled model has also been manufactured in 50 Hz.

The water cooled A and B series models have different water cooled condensers. Be sure to check the complete model number.

The C series has a different compressor. Be sure to check the complete model number.

The gear reducer changed design in February 2007. Confirm the part number from the tag on the gear reducer to supply the correct part.

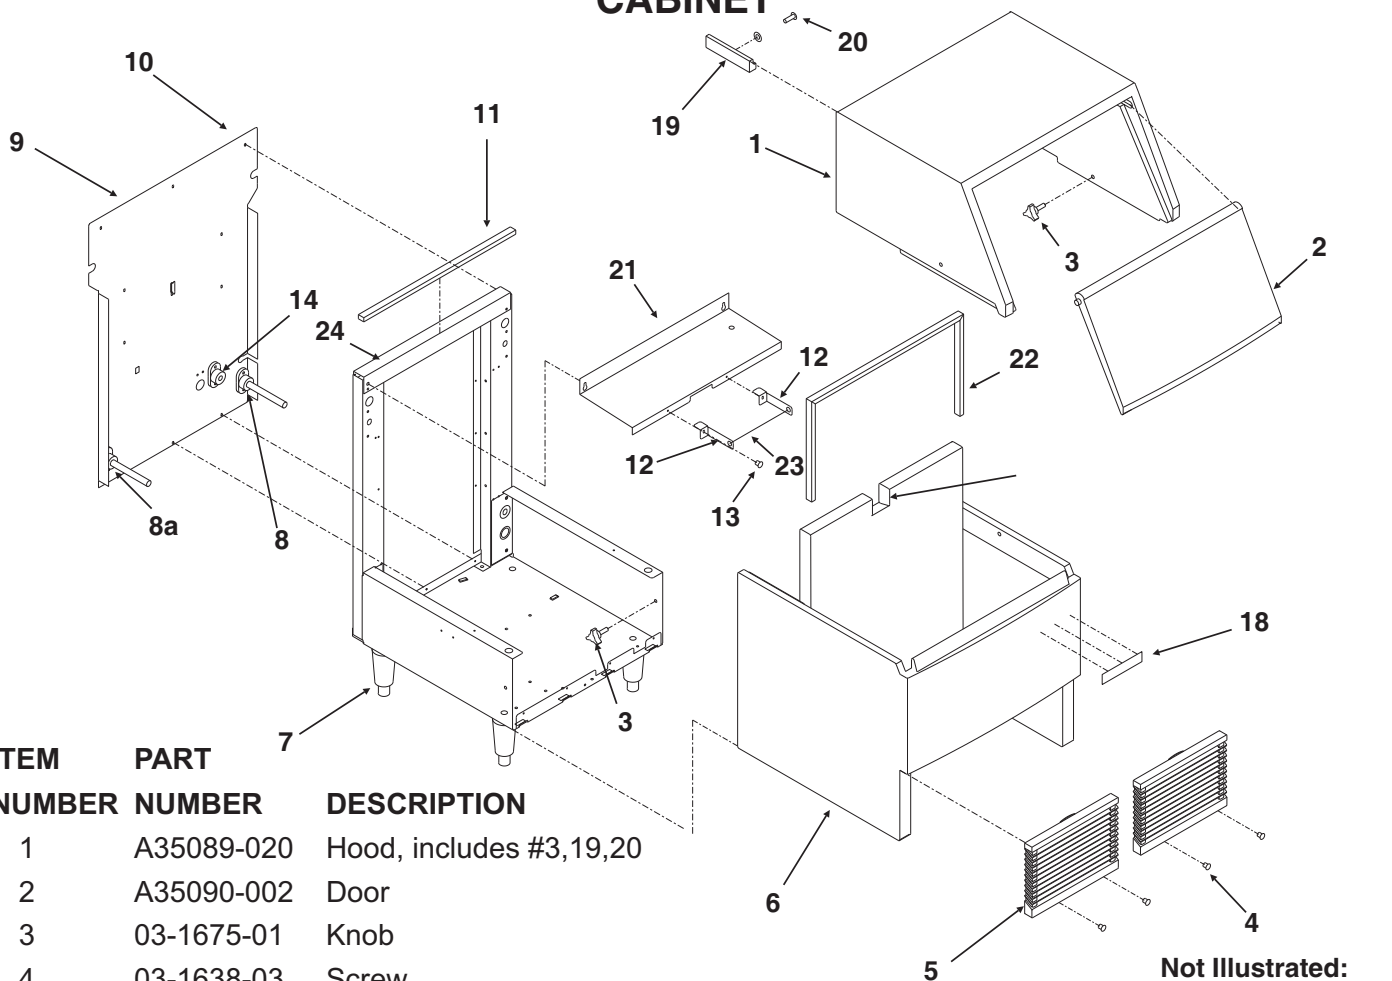

Plastic tubing is sold by the foot, order 1 unit, and 1 foot will be shipped. Order enough to cover the length required. Lengths of tubing are listed under the description column.
